GCSE English language work book

<https://www.tes.com/teaching-resource/gcse-english-language-workbook-11873087>

- When shopping - ask you child to look for the cheapest & most expensive product - for example tin of beans - work out the difference.
- Ask your child to read the amount of the bill, take out the total money & count the change.
- Kitchen- While preparing a recipe, children can help in the task of measuring or weighing ingredients. This can help them to review and understand fractions. A good idea is to allow children to cut slices of a pie, cake or pizza.
